

**The Franklin Twp. Steering Committee of the Franklin Township Task Force (opposed to the proposed Compressor Station 206 and Pipeline Expansion), thanks the Franklin Woman's Club for their active participation in efforts.**

What can you do now?

1. If you are unaware of the health, safety, environmental detriment that may be caused by the presence of a gas compressor station in Little Rocky Hill area of our township, get informed by visiting website [www.scrap-nese.org](http://www.scrap-nese.org).
2. Sign up to be an intervenor, which is a person or organization that has a voice to the Federal Energy Regulatory Commission, the body which ultimately grants approval for gas pipeline expansion and compressor stations.
3. If you are already an intervenor, add comments that follow up on the fact that Williams Transco has not addressed areas of concern regarding various emissions, water quality & safety issues. Samples of letters are on the [www.scrap-NESE.org](http://www.scrap-NESE.org) website.
4. Visit the SCRAP-NESE website to learn more, and consider making a donation to the legal fund. [www.scrap-nese.org](http://www.scrap-nese.org)
5. Volunteer to read a portion of Draft Environmental Impact Statement (DEIS) which we are now expecting to be released in March. Please email Linda at [lindardathome@msn.com](mailto:lindardathome@msn.com) or Surendra at [Surendra7581@gmail.com](mailto:Surendra7581@gmail.com) if you or anyone you know can help with this.
